Reliable & dependable

Forbatt Lead Acid Batteries have been on the South African market for over 24 years. The market share has grown in leaps and bounds, making it one of the top choices for professionals, installers, specialists, and end users. The key to our growth has been the reliability of our batteries across the range. Our build quality and longevity are amongst the best on the market - just ask the professionals that use Forbatt Lead Acid Batteries.

Sealed lead-acid batteries are the least expensive battery option per watt-hour on the market. In addition, the manufacturing process of sealed lead-acid batteries is a mature, reliable, and well-understood technology. Our sealed lead-acid batteries offer a wide range of capacity options for different applications and equipment. More importantly, our sealed lead-acid batteries have one of the lowest self-discharge rates

in the family of rechargeable battery systems. This means they are not only economical, but they also have two critical abilities - durability and dependability.
