

Script Technology

SMART PTT RADIO SYSTEM

The future has arrived.

Incomparable integration.

The stand out advantage of the Tokie PTT radio system is that two way radio communication can be deployed almost anywhere with no major fixed costs to the customer other than the rental or purchase of the radio and the cost of the subscription to the service.

The system allows for country wide as well as international coverage to be obtained and uses the cellular networks (4G LTE, 3G, 2G) as well as Simplex and Digital radio infrastructure. Therefore ensuring excellent range of coverage.

DISPATCHER – COMMAND AND CONTROL CENTRE

Welcome to the new era of control.
One system. Multiple objectives met.

The Dispatcher – Command and Control Centre gives users a best-in-class management and control platform which has been a game-changer in terms of modern day radio communication. It not only allows users to receive more information from the control centre, but also allows a significant amount of data to be sent back. This ensures more control over users and better decision making to be made due to the indepth information available.

GUARDING SOLUTION

One system, multiple objectives met.
Intelligence, communication and control.

Script's Guarding Patrol System is a highly innovative and cost-cutting integrated solution which eliminates traditional guard clocking and reporting systems. Gone are the days for the need to carry multiple devices and use different systems for communication and reporting. The system uses the same radio device along with integrating NFC, QR and GPS points for the patrol reporting; simplifying and modernizing the process and allowing for live reporting to take place. The integration of GPS points with static points ensures guards are moving at all times.

RADION R30

Revolutionary Communication

Experience a new era of communication with the Radion R30, a state-of-the-art Push-to-Talk (PTT) radio. Operating on the powerful Android 11 platform, the R30 goes beyond traditional PTT functionality, offering enhanced performance without the need for a screen.

Reliability and Clarity Combined

Built to last, the R30 features an extended battery life, ensuring lasting performance for your most demanding communication needs. Paired with its active voice enhancing microphone, which provides unparalleled audio clarity by filtering out background noise, the R30 stands out as the optimal choice for robust, clear, and reliable communication. Experience the Radion R30: where endurance meets excellence.

RADION R40

Versatility Meets Functionality

Embrace the future of connectivity with the Radion R40, a unique mid-tier Push-to-Talk (PTT) radio. The R40 combines the practicality of traditional PTT communication with the convenience of modern features, elevating your communication experience to a new level.

Performance and Innovation Combined

The R40 boasts a larger screen for improved user interaction and an integrated camera, introducing an element of visual communication. Coupled with an extended battery for long-lasting performance and an active voice-enhancing microphone for crystal-clear audio, the R40 signifies a perfect blend of performance and innovation. Welcome to the Radion R40, where functionality takes centre stage.

RADION R60

The Apex of PTT Smartphone Innovation

Elevate your communication experience with the Radion R60, our flagship device that redefines the standards of Push-to-Talk (PTT) functionality. Operating under Google Mobile Services (GMS), the R60 marries the power of Google's apps and services with our innovative PTT technology, creating a next-level tool for modern communication.

Superior Performance, Exceptional Durability

At the core of the R60 is its unrivaled PTT functionality, epitomized by a dedicated PTT button designed for an impressive 450,000 pushes. Combined with a speaker meticulously crafted for PTT, the R60 guarantees crystal-clear audio quality, enabling seamless communication.

Setting the Benchmark in PTT Smartphone Functionality

Embrace the future of PTT communication with the Radion R60. More than just a smartphone, it represents our commitment to innovation, excellence, and performance. Experience the ultimate fusion of sophistication, functionality, and reliability with the Radion R60.

RADION R80

Power and Functionality Redefined

Discover the new benchmark in industry-focused communication with the Radion R80. With its large 5.5" HD+ screen and robust specifications, the R80 isn't just about voice – it's a comprehensive tool designed for power users in warehousing, asset control, access control, emergency services and medical care environments.

Unmatched Performance and Durability

At the heart of the R80 is a powerful setup, boasting 6GB of RAM for smooth multitasking and prompt responsiveness. The device integrates a 2D scanner for efficient asset and access management, supporting diverse operational needs with ease.

The R80's large 5.5" HD+ screen not only provides excellent visuals but also serves as an intuitive interface for interacting with complex applications and data systems. This means critical information is always just a glance away, ensuring maximum productivity and efficiency.

RADION R90

Revolutionising On-Person Recording

Step into the future of on-person recording with the Radion R90, a next-generation LTE body worn camera. Powered by Android and integrated with the Radion Flow platform, the R90 delivers a seamless and efficient user experience.

Superior Performance and Cutting-Edge Technology

The R90 is equipped with three integrated cameras, including a 13MP primary camera that boasts night vision capabilities, ensuring high-quality imagery in all light conditions. Its 3-inch screen offers a clear, user-friendly interface to maximize

innovatively designed with built-in AI capabilities, the R90 provides intelligent recognition features for a smarter, more intuitive user experience. The hot-swappable battery supports up to 12 hours of recording, ensuring you won't miss any crucial moments.

Unleashing the Reta R9 TABLET

Superior Performance, Reliable Security

Discover the perfect blend of power and performance with the Reta R9 Tablet. Running on Android 10.0 and the MTK6771 hardware platform, it offers two impressive configurations: 4GB RAM + 64GB ROM or 8GB RAM + 128GB ROM to meet your unique storage and multitasking requirements.

Clarity, Capture, Security

The R9 features a stunning 10.1" IPS display with a QVGA resolution of 1280x800, ensuring crystal clear visuals. Capture high-quality images and videos with a 13 million pixel rear camera and a 5 million pixel front camera, with support for 720p video recording.

Prioritising security, the R9 comes equipped with a high-level fingerprint recognition system and an integrated 2D scanner for seamless data capture and verification.

TOKIE TK3100 MOBILE PTT RADIO

Our TK3100 model offers fleet users to communicate with the user on the move with the handheld mic or BT PTT button. It also tracks the vehicle location with built-in GPS and record video of the driver from the front-camera.

Useful for drivers as it can stick to the steering wheel or hang from your wrist. Paired over BLE without the need to change the battery frequently.
